DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a human prostate cancer-associated neuroendocrine (NE)-like cell line, classified in class 435, subclass 325.
- II. Claim 5, drawn to a method for obtaining a NE-like cell line from prostate cells, classified in class 435, subclass 325.
- III. Claims 6-11, drawn to a method for identifying agents that increase biomarker protein level in NE-like subclone cells, classified in class 435, subclass 7.1.
- IV. Claims 6-11, drawn to a method for identifying agents that increase biomarker mRNA level in NE-like subclone cells, classified in class 435, subclass 6.
- V. Claims 6-11, drawn to a method for identifying agents that decrease biomarker protein level in NE-like subclone cells, classified in class 435, subclass 7.1.
- VI. Claims 6-11, drawn to a method for identifying agents that decrease biomarker mRNA level in NE-like subclone cells, classified in class 435, subclass 6.

In addition, upon the election of any of groups I-VI, further election of the following patentably distinct species of the claimed invention is required:

NE-1-3, NE-1-8 or NE-1-9.

Upon the election of any of groups III-VI, further election of the following patentably distinct species of the claimed invention is required:

Any one of the markers recited in claim 7.

The inventions are distinct, each from each other because of the following reasons:

Inventions (I) and (II-VI) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. 806.05 (h)). In this instant case, a cell line could be used for testing drugs, for testing the expression of different genes, and for treating diseases.

The methods of groups II-VI are distinct from each other because they differ at least in objectives, method steps, reagents and/or dosages, and/or schedules used, response variables and criteria for success.

The species cell lines are distinct, because they have different properties.

The species biomarkers are distinct, because they are structurally distinct. Because these inventions are distinct for the reason given above and have acquired a separate status in the art, and because the searches for the groups are not co-extensive, restriction for examination purposes as indicated is proper.

Applicants are required under 35 USC 121 to elect a single disclosed group for prosecution on the merits to which the claims shall be restricted. Applicant is further advised that if Applicant elects a group having species requirement, a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103 of the other invention.

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
